SUMMARY

Senior full-stack engineer with 4+ years building and shipping production software in **React**, **Next.js**, **Node.js** and **TypeScript**. I own projects from architecture to deployment and care about scalable systems, reusable components and code that stays maintainable. Hands-on with REST APIs, SQL and NoSQL databases, real-time systems with WebSockets, Docker and CI/CD pipelines. I also integrate LLMs into products (RAG, AI agents, speech-to-text and text-to-speech), use AI coding agents daily in my workflow, review code, write tests and mentor other developers.

EXPERIENCE

Founder & Senior Full Stack Engineer

Aug 2025 – Present

Octopora, MenuMate & 9hiwa.tn + freelance · Remote

- Own products end to end in **Node.js**, **React** and **TypeScript**, from first prototype through testing and production, working directly with users and stakeholders to shape what gets built.
- Design interactive prototypes, iterate on the UI/UX and improve user flows based on analytics and how people actually use the product.
- Built **MenuMate**, a restaurant SaaS platform with QR digital menus, table management and online ordering that restaurants can configure to fit their service.
- Built **Octopora**, a B2B SaaS workspace for project delivery, tickets, messaging, calendars and time tracking, backed by REST APIs, background workers and async job queues.
- Developed **Helpi**, an AI agent that manages project resources using LLM integration and retrieval-augmented generation (RAG), with speech-to-text, text-to-speech and transcription built on free infrastructure.
- Built **9hiwa.tn**, a real-time multiplayer platform on WebSockets that handles live game state, matchmaking queues and async updates at scale.
- Deliver freelance client work full cycle: design, development, hosting, SEO and analytics. Projects include SolarixPro and other data-heavy dashboards and integrations.
- Handle maintenance, bug fixing and tech debt to keep codebases healthy, and deploy to Vercel and self-managed VPS servers with **Docker**, **NGINX** and **CI/CD** pipelines.
- Use AI coding agents (Claude, Codex, Cursor) daily for development, debugging and documentation.

Software Engineer

Aug 2023 – Aug 2025

KPIT Technologies · Full-time

- Designed, built and shipped features across the stack in **React**, **Angular**, **TypeScript** and **Node.js**, improving delivery speed and runtime performance.
- Ran technical analysis and investigations for new developments and worked with the team on design decisions.
- Took part in tech RUNs covering bug fixing, maintenance and tech debt, and kept quality up through code reviews and testing.
- Configured and maintained **GitLab CI/CD pipelines**, improving build reliability and reducing manual deployment effort.
- Mentored interns and junior developers, sharing knowledge and helping establish engineering best practices.

Full Stack Developer

Jun 2021 – Jun 2023

Global Web Marketing · Part-time

- Built and modernized ERP and business platforms (**JavaScript, Tailwind CSS, Laravel, MySQL, PHP**), improving usability for daily business users.
- Worked directly with stakeholders to define and prioritize features, managing tasks, bugs and feedback through Jira in Agile/Scrum teams.
- Automated testing workflows and wrote unit and functional tests, reducing manual QA effort.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind CSS, responsive design, reusable component libraries

Backend: Node.js, NestJS, Express.js, REST APIs, WebSockets, PHP, Laravel

Databases: PostgreSQL, MySQL, SQL, MongoDB, Redis, Supabase

AI & LLM: LLM integration, retrieval-augmented generation (RAG), AI agents, prompt engineering, speech-to-text, text-to-speech, AI coding agents (Claude, Codex, Cursor)

DevOps & Tooling: Docker, NGINX, Git, GitLab CI/CD, Vercel, VPS/cloud deployment, testing (Jest, unit & functional tests)

Architecture: Scalable system design, clean architecture, design patterns, performance & security, real-time and asynchronous/event-driven systems, caching

Ways of working: Project ownership, product discovery, code review, mentoring, Agile/Scrum, stakeholder communication

EDUCATION

Higher Institute of Computer Science and Multimedia of Sfax

Master's in Project Management & Innovation

2021 – 2023

Bachelor's in Computer Science

2018 – 2021
