

Achref Gallaoui

Fullstack Software Engineer | Node.js, React & TypeScript

achref.gallaoui.dev@gmail.com (+216) 52 015 939 github.com/gallaoui

SUMMARY

Fullstack software engineer with 5+ years shipping features from discovery to production in Node.js, React and TypeScript. I enjoy working close to the product, turning stakeholder feedback and user needs into clean solutions, and I care about code quality through reviews, testing and keeping tech debt in check. I have hands-on experience with REST APIs, PostgreSQL and async, real-time systems, and I already use AI coding agents daily as part of my workflow.

EXPERIENCE

Founder & Fullstack Engineer

Aug 2025 – Present

Octopora, MenuMate & 9hiwa.tn + freelance · Remote

- Own products end to end in Node.js, React and TypeScript, from prototyping and **UI/UX design** through development, testing and production, working directly with users and stakeholders to gather feedback and shape the product.
- Design **interactive prototypes** and iterate on the UI/UX, then keep a close eye on progress and continuously improve flows based on how people actually use the product.
- Built MenuMate, a **restaurant software platform with QR digital menus**, table management and online ordering, giving restaurants configurable tools to run their service.
- Built Octopora, a **B2B workspace** covering project delivery, tickets, messaging, calendars and time tracking, backed by REST APIs and async workers.
- Built 9hiwa.tn, a real-time multiplayer platform, handling **live game state**, queues and **async updates** at scale.
- Deliver freelance client work full cycle, handling **design, development, hosting, SEO and analytics** to track user behavior and guide improvements, including SolarixPro and other data-heavy dashboards and integrations.
- Handle maintenance, bug fixing and tech-debt management to keep the codebase healthy, and **deploy with Docker, NGNIX** and CI/CD.
- Use AI coding agents throughout development, debugging and documentation to **move faster without compromising quality**.

Software Engineer

Aug 2023 – Aug 2025

KPIT Technologies · Full-time

- Designed, developed and shipped features across the stack in React, Angular, TypeScript and Node.js, improving delivery speed and runtime performance.
- Carried out technical analysis and investigations for new developments and proposed **technical design decisions** with the team.
- Participated in tech RUNs including bug fixing, maintenance and tech-debt management, and enforced quality through code reviews and testing.
- Configured and maintained **GitLab CI/CD pipelines**, improving build reliability and reducing manual deployment effort.
- **Mentored interns and junior developers**, sharing knowledge and helping establish engineering best practices.

Fullstack Developer

Jun 2021 – Jun 2023

Global Web Marketing · Part-time

- Built and modernized ERP and business platforms (JavaScript, Tailwind CSS, **Laravel, MySQL, PHP**), improving usability for daily business users.
- Worked directly with stakeholders to define and prioritize features, managing tasks, bugs and feedback through Jira in Agile teams.
- Automated testing workflows and wrote unit and functional tests, **reducing manual QA effort**.

SKILLS

Backend	Node.js, NestJS, Express.js, REST APIs, PHP, Laravel
Frontend	React, Next.js, TypeScript, JavaScript, Angular, HTML5, CSS, Tailwind CSS
Databases	PostgreSQL, MongoDB, Redis, MySQL, Supabase
DevOps & Tooling	Docker, Git, CI/CD, cloud deployment, testing (Jest)
Ways of working	Product discovery, stakeholder feedback, code review, mentoring, Agile/Scrum, AI coding agents (Claude, Coodex, Cursor)

EDUCATION

Master's in Project Management & Innovation, Higher Institute of Computer Science and Multimedia of Sfax

2021 – 2023

Bachelor's in Computer Science, Higher Institute of Computer Science and Multimedia of Sfax

2018 – 2021
